# The Technal Key to constructive thinking

This locking key is the key to the new Technal extruded aluminium sections. It'll tighten up your design requirements.

Technal is simpler, faster and more versatile. No tapping. No welding. No bolting. Ideal for inside or outside work. Made from maintenance free anodized aluminium.

It's easy to specify. Put your imagination to work: Technal will follow it.

Whether you're designing offices—glass and solid panelled—permanent or moveable frames, or even furniture. You name it—Technal will construct it.

It's clean and beautifully modern. Faster and easier to construct, with the minimum of labour. And it's economical.

Any of the addresses below will tell you about new Technal. They'll even construct it for you. Write or phone your nearest distributor now—

## HILLS

## A BREATH OF FRESH AIR IN WINDOW DESIGN

PANOGEAR by Hills takes the simple ventilation principle of the sash window and brings it right into the sophisticated 70's. Gives it a handle too, with a selector button to control the raising and lowering of both sashes independently with the operating gear neatly concealed in the aluminium frame.

Double glazed with Hills "Glaseal" units, PANOGEAR windows achieve the best of both worlds—ventilation and insulation—in the simplest possible way. These are the windows chosen for the important projects all over the country.

If you would like to see how Hills experience can help you in the matter of efficient window treatment, just clip the coupon.

## PANOGEAR

one of a wide range of Hills specialities in glass or glass and aluminium for the modern building world.
